

Precision Bench Levels with Double Plumbs

- Filigree design of these levels provides a lighter weight, and the curved design evenly dissipates excess heat
- The base of the levels has an involute groove running the full length, which provides a reliable seat for round work
- All sizes have a main vial and double plumb vials. Each vial has two graduated lines

Size in.	mm	Description	Model No.	EDP No.	Price /Each
6	150	With Main Vial and Double Plumb Vial	TBB422	50562	
9	225	With Main Vial and Double Plumb Vial	TBB423	50563	
12	300	With Main Vial and Double Plumb Vial	TBB424	50564	
24	600	With Main Vial and Double Plumb Vial	TBB425	50566	

Note: To guarantee extreme accuracy, the length of your level should not be longer than the work you are leveling.

TBB422

Machinists' Improved Levels with Ground & Graduated Vials

These levels have ground and graduated main vials adjustable to a positive setting and are housed in a satin finished brass tube.

Note: To guarantee extreme accuracy, the length of your level should not be longer than the work you are leveling.

Master Precision Levels 199 Series

This master precision level is especially designed for the setting up, checking and testing of machinery of all types. The efficiency of modern, high speed machinery depends to a large degree upon the levelness of the machine set-up. With this master level, machine operators, set-up, and maintenance men can tell at a glance the exact variation of the levelness of the machinery and make the necessary adjustments.

- Ground and graduated main vial of 10-second accuracy; one division equals 1/2 thousandth (0.0005) of an inch per foot, or 0.04 mm per meter
- Main vials have seven graduations on each side of the bubble
- Auxiliary level vial shows lateral position and assists in horizontal setting
- Level vials are positioned so breakage is reduced to a minimum
- Fool-proof adjustment to avoid tampering, once set
- Special alloy iron used to obtain freedom from thermal effects
- Castings are thoroughly seasoned and machined
- Reference surface is scraped
- Non-machined surfaces have a black wrinkle finish
- Insulation from handling by means of top plate of nonconductive material
