

Versaflo™ TR-300 Powered Air Purifying Respirators (PAPR)

- Significantly smaller and lighter than existing 3M™ belt-mounted PAPR's
- Weight is kept close to the users back, reducing the leverage effect that can cause PAPRs to feel heavier
- Slim profile is designed for use in tight spaces
- Simple, 1-button operation
- Two types of alarms – one audible and one LED – alert the user to either a low battery or low airflow
- Battery and filter can be changed quickly and easily by hand
- Smooth surfaces are less prone to snagging on objects, and facilitate fast wipe downs for easy cleaning
- Air inlet design helps make sitting possible without compromising air intake
- Window on the filter cover allows easy identification of the type of filter installed
- Lightweight lithium ion battery charges quickly and has no memory effect or heavy metals
- LED lights on the battery indicate its charge status both on and of the charger
- Two selectable flow options offer users greater comfort
