

KwikBoost® Self-Service Charging Locker

Secure, Fast, and User-Friendly Charging

The KwikBoost® 8-Bay Self-Service Charging Locker is a comprehensive solution that keeps your guests charged and connected while they are on the move. Featuring a large touchscreen interface for a user-friendly experience, this charging locker is compatible with all types of devices, from phones to tablets to laptops, up to 13 inches. This versatility makes it a standout solution for spaces like hotel lobbies, conference centers, airport lounges, and more. Wherever your guests are, the KwikBoost® 8-Bay Self-Service Charging Locker ensures they have the power they need for the devices they have, all while keeping them safe and secure.

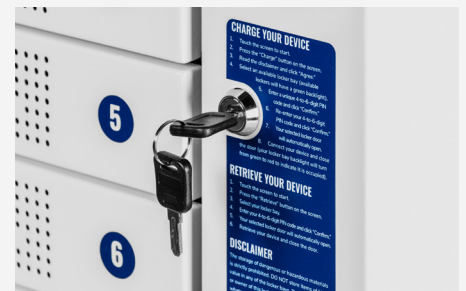

Improve Guest Satisfaction

Empower your guests to stay charged and connected on their terms with easy and intuitive self-service charging for an improved guest experience.

Support a Range of Devices

With versatile charging capability, the Self-Service Charging Locker allows your guests to store and charge a range of devices – including phones, tablets, or laptops up to 13”.

Maximize Peace of Mind

Built using powder-coated steel construction and a robust locking mechanism, the Self-Service Charging Locker reduces tampering risk and keeps devices secure.
