

Pole Climbing and Rescue | Duration: 16 hours

Maximum Participants: 8 students | Product Code: SHC134

COURSE TOPICS:

- Regulations and standards governing work on wood poles
- Fundamental principles of fall protection
- Fall Restricting Equipment for wood poles
- Wood pole climbing techniques
- Maneuvering obstacles on wood poles
- Mastering safe methods for working on wood poles
- Wood pole rescue systems and equipment
- Wood pole rescue methods
- How to respond appropriately in an emergency

COURSE DESCRIPTION:

Wood pole climbing involves a unique set of hazards due to the specialized equipment and climbing techniques required. Our two-day Pole Climbing and Rescue course introduces students to the regulations, standards, basic concepts, and equipment with respect to pole climbing, with both theoretical and practical components.

Once they are comfortable ascending, descending, and positioning on wood poles, our students will have the opportunity to practice rescuing a suspended worker from the wood pole using weight transfer and descent control devices.
